

Transportation Management & Design, Inc. TMD has been serving the transit industry since 1988, specializing in service planning and market development, service efficiency and effectiveness, and support of daily service operations, including scheduling.

The company’s success is substantially the result of our focus on ensuring a positive outcome for each of our clients, in both project approval and project implementation. Our Senior Staff has first-hand management and technical experience in the development, implementation, and ongoing assessment of a wide range of transit solutions at a number of diverse transit agencies, both as system staff and as consultants. We have achieved a high level of success at systems ranging from small agencies with single-mode fixed route or demand-responsive systems, to large multi-modal rail and bus systems. TMD has a history of providing clients with an effective and strategic approach to projects while ensuring that innovative ideas can be successfully translated into sound tactical operating recommendations.

Our main offices are located in Southern California and Melbourne, Australia, with supporting regional offices in New York, Oakland, and Kansas City.

TMD specializes in the following transit consulting areas:

- Transit Service and Operations Optimization
- Innovative Transit Service Design
- Short & Long Range Transit Planning
- Transit Vehicle and Operator Scheduling
- Operations & Fleet Management
- BRT Planning & Operations
- Geographic Information Systems
- Fare Policy Analysis
- Marketing and Market Research
- Training
- Facility Development
- Performance Monitoring

Three core philosophies guide TMD in its work:

Client success is built into our transit work; not an afterthought: This comprehensive approach which integrates customer market opportunities, effective and efficient service design, and sound transit operations has proven to yield the greatest success for our clients.

Continuous improvement: We are constantly refining our techniques and tools, utilizing state-of-the-art technology systems to support our practices including: ESRI’s ArcGIS Desktop Suite for GIS-based market and service analysis tools; Giro’s HASTUS for advanced transit scheduling; TMD’s Service Analysis System; and TMD’s Handheld Data System.

Responsiveness to client needs and direction: TMD believes that each client has unique circumstances and deserves analysis and recommendations that respond to their individual needs. We understand that professional success is the result of interactive client-consultant collaboration. This philosophy has allowed us to successfully respond to the unique interests of each of our clients and build lasting relationships.
